Memo to File:

Re: Sapphire Corporation
Spectrum Quarry Mine
Millard County
ACT/027/003
(formerly filed under
Merd Corp. (Merco))

Mr. Clyde Cheney of Sapphire Corporation visited with Mike Thompson and Jim Smith on February 8, 1979 to discuss the items needed by the Division before the approval process can continue for the Spectrum Quarry.

Items discussed included the required map, a commitment to Rule M-10, the reclamation standards, material which can be held confidential, revegetation test plots, the reclamation surety, the approval process, and his operation in general.

Mr. Cheney will supply the information as soon as possible. Another field inspection should be performed after the Division receives this material so that the approval may be expedited.
